# Document Forensics

Scan **any document** from **anywhere** for fraud and authenticity in seconds

Document fraud has changed. With editing tools and online template farms making it impossible to spot forged onboarding and underwriting documents with the naked eye, more and more decisions are made on "gut feel." No more. Confidently take in any document in PDF or image formats with Resistant AI.

dun & bradstreet   KBC   Payoneer   xtb   Raiffeisen Bank   Plus500   SOCIETE GENERALE   verto

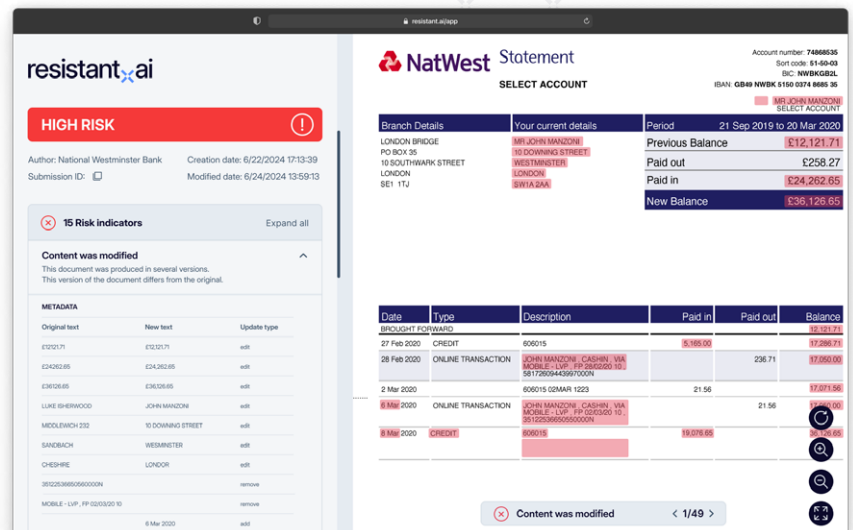

Fast-track good customers

Automatically process documents worry-free if they show no signs of modification or are verified as trusted—our gold seal of authenticity with 99.99% accuracy.

- Works on PDF and images
- Language & document agnostic
- Use via Web interface or API

Confidently stop bad ones in any language

Metadata, internal structures, image consistencies, fonts in use... We analyze every document over 500 ways for signs of fraud to ensure high precision

- Works on unknown documents
- Results in under 20s
- Detailed explainable findings

Get clear actionable verdicts, not "risk scores"

What do you do with a 68% vs a 82% risk score?

Cut out the noise and get a clear view of your risk:
- **High Risk:** this document is likely fraudulent and should be declined.
- **Warning:** this document is modified and should be reviewed.
- **Normal:** there's nothing wrong with this document and can be accepted.
- **Trusted:** this document perfectly matches authentic ones.

Book a demo today

Spot deepfakes, gen AI, template farms and other serial fraud attacks

As many as 2% of onboarding and underwriting documents are based on reused or generated documents. Detect the most sophisticated threats to root out waves of crowdsourced first party fraud and targeted attempts by tech-enabled organized crime rings.

The original template

Found in different customers datasets with altered bank logos

Found transformed into scans and images with **new textures and backgrounds** in yet more customer datasets

| 100M+	10×	3×	80%
documents analyzed	fewer manual reviews	less fraud	faster onboarding

Protect your document automation with customized verdicts that perfectly match your risk appetite

Any aspects of the document—from what it is, to who issued it, to the types of modifications it underwent—are yours to use for customized verdicts that will match your risk appetite and business goals.
